INDOOR SEED START CHECKLIST — YEAR:	
	Check Planting Rhythm chart: What are you planting today?
	Plant *one* thing at a time.
	Check Indoor Seed Start chart: Choose styrofoam flats/peat pots.
	Read seed packet (heat, planting requirements).
	Label styrofoam flats/black trays (for peat pots).
	Mix ETS/Soil into starter soil (if not already done).
	Soak wick in ETS/Plants water. Place peat pots in black tray (w/ no drainage holes).
	Fill cells/pots with soil (fill to top, tap on table to settle soil, fill again, tap again).
	Empty needed seed packets into small glass bowl.
	Sprinkle 3–6 seeds per cell.
	Sprinkle soil on top of seeds to cover (per pack's depth instructions).
	Press soil gently in each cell/pot with thumb or finger (to remove air pockets).
	Gently mist with ETS/Plants water to fully moisten soil (not too wet).
	Choose heat mat placement out of direct sun & check temperature of heat mat.
	Place wet wick on heat mat & cells directly on wicks or black trays w/ pots on heat mat.
	Cover with clear flat lids.
	Place 2 labeled markers with each tray (color coded with plant name).
	Put one empty seed packet in file box for reference.
	Clean potting table. Put all excess soil in compost bucket *before* starting next planting. Never re-use soil.
	Clean, rinse and dry bowl used for seeds before next planting.
	When finished planting for the day, toss the ETS water in different spots (each day) outside the garden area.
